YAKATTACK BLACKPAK SKINS

The BRD team is a group of passionate folks that love being on the water, fishing, kayaking, scuba diving and paddle boarding. Our goal is to enrich others that also enjoy being on the water with enjoyable events and cutting edge products. Our research and development team spends countless hours on the water testing and refining our products. A very special thank you to all our customers for helping us help other, a portion of each sales goes towards keeping our water clean and we also always trying to help those in need. *The BRD Team*

BRD KAYAK SKINS, do not use wrap material which is 2 mil thick, our material is 13.5 mil thick and formulated special for marine use in fresh or salt water. The total weight of our Kayak Skins for most kayaks is about 2.5 pounds. Each BRD SKIN is an exact fit to your kayak, easy to install and very forgiving in the install process which take about 30 minutes to complete. This is also a great way to attract more sponsors in because now your Kayak becomes a large floating and traveling billboard, on and off the water. We have endless design options available, along with Skins for paddle blades and shaft rulers along with Yak Attack Black Pak Skins. We also do graphic for your car, truck, boat, plain or train. No limit to our Sky to create that one off design you can sport proudly! The unit can also be removed without any damage to your kayak. We also have an install video, that many use with no issue.

*It's been over a month since I purchased my Bonafide SS127 with the BRDjet LAS kayak skin. I've been able to hit the water sixteen times to "test" the durability of these skins. I've not babied this kayak in any way. I fish in some rough area's and worrying about scratching a kayak wrap was the last thing on my mind. I've hauled four kayaks in a trailer, two in my truck, and I've loaded and unloaded it solo by myself. So, I wanted to provide some honest feedback. Overall Durability- I've hit large rocks, scraped it along banks and every possible piece of structure in the lake/river. It's also been exposed to nasty, muddy water. There's not a single scratch on this wrap anywhere! None. My kayak hull has scratches, but nothing on the wrap. I was absolutely shocked, honestly. There's no evidence of peeling, cracking or fading thus far. I do think they protect the kayak hull from normal usage. I'll be the first to admit, I do not wash my kayak after each use. (only when I'm fishing a new area) I fished the same muddy lake 4 days in a row now and that wrap was nasty! It had a brown ring all the way around it. It reminded me of fishing Caddo Lake! HA! So, just out of curiosity, I sprayed my kayak off, used a soft wet sponge with no cleaning agent and to my surprise, the ring wiped cleaned without having to scrub it off.*

*Now, that I've personally tested the kayak skin, would I recommend it? Yes. It's durable, it protects the hull from scratches and easy to clean. It also allows Anglers to customize their kayaks, making it their own. I have received so many compliments and messages about my kayak wrap. I keep the conversation short, and simple. I provide the customer with the Bonafide website. But, whenever he/she goes on the Bonafide website and see the price, they quickly change their mind. However, I personally think if a Bonafide dealer had at least one wrapped kayak at their location for customers to see and educate them about the product, there's no doubt in mind that these kayak skins would sell. I say this only because after people saw mine in person, They're planning on adding a wrap to their Bonafide. I actually ordered my Husband an SS127 in Hondo orange with the Blackout kayak wrap. Overall, I'm extremely pleased with the appearance and durability of the BRD Kayak Skins. I would highly recommend them. Chasity Ball*
